TLS Trends:
A roundtable discussion on current usage and future directions

Communications Security Establishment Canada (CSEC)
This presentation is up to

TOP SECRET//SI

//REL TO

CAN, AUS, GBR, NZL, USA
Outline

• Background
• Implementation
• Trend Report
• Success Stories
• Future Development
• Questions
Background

• Objectives:

  – Identify capabilities in existing warranted SSL/TLS traffic

  – Generate regular trend reports and analysis

  – Identify abnormalities and technology changes

  – Be proactive!
Implementation – Warranted Collection
Implementation – Special Source

Identify TLS

Trend Report – Warranted Collection

- Inspired by GCHQ weekly TLS Trend Reports

- What we’re tracking:
  - Amount of SSL/TLS traffic seen
  - Cipher Suite Breakdown (RSA vs EC vs DH)
  - SSL/TLS Version Breakdown
  - Top Certificates seen by Common Name
  - Top RSA Certificate Moduli seen
  - Top DH Moduli seen
  - Percentage of Resumed Session
  - Session Ticket Usage, Elliptic Curve Usage
  - RSA & DH Modulus Size Breakdown
  - New DH moduli
  - Top new RSA moduli
RSA Key Size Trends
(warranted only)
DH Modulus Trends
(warranted only)
Public Key Exchange Methods (warranted only)
Target Specific reporting
(warranted only)

• Intended to engage analysts in identifying traffic of interest
  – Show the known services their target is using
  – Ask them to help identify unknown services
  – Identify changes in their target’s use of TLS
Sample Report

Trends Report for Canuckistan in the month of April

Table 1. Types of TLS traffic in working hours (7am to 6pm) and out of hours

<table>
<thead>
<tr>
<th>WHO</th>
<th>OUT_HOURS</th>
<th>IN_HOURS</th>
<th>TOTAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>Google</td>
<td>1479</td>
<td>2782</td>
<td>4261</td>
</tr>
<tr>
<td>Hotmail/Live</td>
<td>455</td>
<td>934</td>
<td>1389</td>
</tr>
<tr>
<td>Advertising</td>
<td>401</td>
<td>139</td>
<td>540</td>
</tr>
<tr>
<td>Foreign government sites</td>
<td>338</td>
<td>97</td>
<td>435</td>
</tr>
<tr>
<td>Canuckistan Social Media</td>
<td>59</td>
<td>90</td>
<td>149</td>
</tr>
<tr>
<td>Facebook</td>
<td>38</td>
<td>82</td>
<td>120</td>
</tr>
<tr>
<td>Apple</td>
<td>12</td>
<td>2</td>
<td>14</td>
</tr>
<tr>
<td>Banking</td>
<td>5</td>
<td>4</td>
<td>9</td>

<tr>
<td>Transportation sites</td>
<td>3</td>
<td>0</td>
<td>3</td>
</tr>
<tr>
<td>Microsoft</td>
<td>1</td>
<td>0</td>
<td>1</td>
</tr>
</tbody>
</table>
Sample Report (cont’d)

Table 2. Sites visited from the Canuckistan Social Media group

<table>
<thead>
<tr>
<th>WHO</th>
<th>SITES</th>
<th>OUT_HOURS</th>
<th>IN_HOURS</th>
<th>TOTAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>hockeytalk</td>
<td>login.hockeytalk.com</td>
<td>3</td>
<td>10</td>
<td>13</td>
</tr>
<tr>
<td>hockeytalk</td>
<td>chat.hockeytalk.com</td>
<td>31</td>
<td>44</td>
<td>75</td>
</tr>
<tr>
<td>hockeytalk</td>
<td>mail.hockeytalk.com</td>
<td>25</td>
<td>36</td>
<td>61</td>
</tr>
</tbody>
</table>

Comments:
We have noticed a large increase in chat activity on the hockeytalk sites. This is likely due to the beginning of playoff season.
Success Stories

- Easily identified current capabilities in warranted traffic
- Verified certificate being phased out and identified possible replacements
- Corroborated with GCHQ on discovering frequent Google moduli changes
- Currently pushing new moduli for testing against publicly known weaknesses (PHOENIX)
- Identified use of Elliptic Curve Certificates
Future Development

- Trends reports on Special Source collection
- New types of metadata added to database
- Collaboration with CSEC’s Data Mining team
- Improve efficiency, stability of solutions
